

# Japan: Earthquake and Tsunami

Operations Update n° 4  
Glide no. EQ-2011-000028-JPN  
June 29, 2011

Period covered by this Operations Update: 24 May – 29 June 2011

Ms. Takako Inoue, head nurse from Akita Red Cross Hospital talks to a blind and elderly disaster affected person during the morning check up at the evacuation centre in Iwate Prefecture. © JRCS

## Summary:

Operations Update No. 4 captures the events of the Japanese Red Cross response to the Great East Japan Earthquake over the past five weeks. Specifically:

- The Japanese Red Cross (JRCS) has picked up speed in executing a number of projects after consensus was reached on the plan of action, programme and budget presented to the sister societies during the Partnership Meeting on 9 May.
- Worldwide donations received by JRCS exceeded JPY 281 billion, of which JPY 33.5 billion is international donations from sister societies.
- The JRCS has transferred JPY 231 billion to 15 prefectures to assist disaster survivors with cash grant assistance.
- The JRCS has distributed over 36,000 appliance packages to families moving from the evacuation centres.
- 790 medical teams have been mobilized from the JRCS to support the survivors of the earthquake as of this date.

## Background:

- On 11 March 2011 at 05:46 (UTC) Japan was struck by a magnitude 9.0 earthquake, depth 24 km, with the epicentre off its northeast (Pacific) coast. The earthquake generated a devastating tsunami, with waves estimated to reach 38 m. The consequences of the earthquake and tsunami, in terms of deaths, injuries, economic and environmental damage are still being calculated.
- Within 5 hours the Japanese Red Cross had dispatched 19 medical teams to the affected prefectures and set up its operations centre. The JRCS network of 92 Red Cross hospitals provided sites to receive patients and sites to launch mobile health teams. Psychosocial support was provided by trained staff within the evacuation centres. A family links website was established, and relief supplies were quickly dispatched.
- As a result of the main quake and of the ensuing tsunami, reactors within the Fukushima Daiichi nuclear plant were severely damaged, with consequent radiation leaks. On 12 April, the government declared the crippled Fukushima nuclear plant a level 7 on the international scale. The government quickly created a 20 kilometer radius exclusion zone around the plant, from which the residents have been evacuated. Additionally, the evacuation of those living within 30 km, as well as those in some sites farther out began on 15 May, with those being evacuated moving into government provided accommodations and not into evacuation centres.
- As operations continued, JRCSs began receiving substantial contributions from donors, both in Japan and abroad. Consistent with the programme for disaster management in Japan, JRCS participated in the Central Cash Distribution Committee's decision on the criteria for the first and second-round cash grant disbursement, which have now taken place.
- Collaborations within the Movement commenced almost immediately, and a Partnership Meeting was convened in Tokyo on 9 May. A plan to be taken with the National Society contributions was presented, discussed and the actions were agreed among the participating sister societies.

## **The Current Situation:**

As of 23 June, the number of confirmed dead was 15,482 and 7,427 were missing or unaccounted for, down from 9,093 reported on 23 May. 75,215 persons displaced by the disaster remained in evacuation centres and other temporary housing within the three worst affected prefectures (Fukushima, Miyagi, Iwate).

The government enacted the policy efforts to rebuild areas devastated by the March 11 earthquake and tsunami into law on 20 June. The law includes the establishment of a reconstruction agency, dedicated to the rebuilding of Tohoku region and enables the issuance of "reconstruction bonds".

According to the Ministry of Land, Infrastructure, Transport and Tourism, 44,508 units of prefabricated houses have been completed in the three worst affected prefectures (Fukushima, Miyagi, and Iwate) and four other prefectures as of 24 June.

According to the Ministry of Health, Labour and Welfare, the number of people that have filed for the unemployment benefit reached nearly 119,776 as of 8 June in the three most affected prefectures alone. Also, vocational counseling was provided to 390,186 people among the three prefectures between 28 March and 5 June.

According to Fukushima prefecture (population: approx. 2 million), in which the Fukushima Daiichi Nuclear Plant is located in, approximately 97,183 have evacuated from their homes, of which 35,514 have evacuated to outside of the prefecture.

As the demand for electricity is expected to hike during the summer, the Government has announced that a 15% cut be made as a goal for the commercial scale utility production companies. In response, Toyota has announced that their business operations for both offices and the factories shift the "weekend" from Sat./Sun. to Thur./Fri. in order to avoid the hours the electricity would be in highest demands. Other corporations are also making necessary adjustments.

Some of the heaviest rains in the Tohoku region after the 3.11 earthquake which continued for a few days from 22 June have not only delayed the recovery activities in the earthquake/tsunami affected areas but also exposed the region to the risk of flood and landslide. According to the Japan Metrological agency, Tohoku region was exposed to 30 to 40 millimeters of rain per hour.

## Coordination and Partnerships:

A meeting led by the Japan Platform, an international emergency humanitarian aid organization which operates within a tripartite cooperation system with the NGOs, business community, and government of Japan, was held on 10 June at the Japanese Red Cross headquarters. Representatives from 14 NGOs, the Ministry of Foreign Affairs of Japan and the Japanese Red Cross shared updates of their operational activities on in Fukushima, Miyagi and Iwate. This was the third inter agency meeting after the 3.11 earthquake and the first to be held at the Japanese Red Cross headquarters. The meeting is scheduled to be held bi-weekly.

## Japanese Red Cross Action

Strong support of the sister societies has continuously been given to the Japanese Red Cross since 3.11. The JPY 30 billion relief and recovery operation programme and budget funded by contributions from Partner National Societies were well supported during the 9 May Partnership Meeting and the operations are in effect, accordingly.

### Relief and Recovery Operation

Programme	Activities planned
1. Distribution of emergency relief supplies (JPY0.5bill)	Purchase and replenishment of relief supplies
2. Emergency medical services and PSP (JPY0.5bill)	Deployment of medical teams
3. Rehabilitation of health infrastructure (JPY5.0bill)	Construction of the temporary night-time emergency medical center Construction of temporary hospitals as secondary medical care Strengthening disaster/emergency medical capacity of Ishinomaki Red Cross Hospital Establishment of a preparedness centre for disaster medical care
4. Improving the living conditions of affected people in evacuation centers and transition shelters (JPY19.0bill)	Installation of water tanks for hand washing Installation of kitchen, bath and shower Installation of appliance (washing machines, TVs) at evacuation centers Creating play areas for children Distribution of electronic household appliance sets
5. Support to social welfare for the elderly and children's education (JPY3.5bill)	Distribution of medical/nursing beds Procurement of vehicle for social welfare institutions and municipalities Care workers deployment Educational support for children
6. Capacity building of JRCS (JPY1.0bill)	Strengthening DM capacity of the JRCS HQs, chapters and facilities

### PROGRESS TO DATE

#### 1. Distribution of emergency relief supplies (JPY 0.5 billion)

The process for replenishment of relief supplies is in progress. The selection of the vendors for the blankets, emergency relief kits and the sleeping kits will be selected by the end of the month. The supplies are scheduled to be delivered between end October and March 2012.

#### 2. Emergency medical services and PSP (JPY 0.5 billion)

790 medical teams have been mobilized from the Japanese Red Cross nationwide network of 92 hospitals, and 75,642 patients have been treated by these teams. Five teams are currently operating in the three worst affected prefectures of Miyagi, Fukushima and Iwate providing health services to the evacuation centres,

and a further 15 teams are being prepared for future deployment.

Psychological support centres have been established at the Ishinomaki Red Cross hospital in Miyagi prefecture and at the Iwate chapter in Iwate prefecture. A total of 467 staff members working within the psycho-social programme (PSP) have been deployed in the affected areas of Iwate, Miyagi and Fukushima prefecture as of 24 June. 9,368 people have benefitted from the JRCS PSP team's support as of 24 June.

### 3. Rehabilitation of health infrastructure (JPY 5.0 billion)

Discussion on the temporary night-time emergency medical centre and the construction of a temporary hospital, as secondary medical care in Ishinomaki, is in process.

### 4. Improving the living conditions of affected people in evacuation centers and transition shelters (JPY 19.0 billion)

<Installation of water tanks for hand washing>

12 water tanks and taps for washing hands have been set up in nine evacuation centres around Ishinomaki area in April. The tanks and taps are generally located close to the toilets to promote proper sanitation.

<Installation of appliance (washing machines, TVs) at evacuation centres>

In addition to household appliance packages, electrical appliances, including large TVs, washing machines and hair driers, have been distributed to evacuation centres in Fukushima, and 500 air purifiers were put into operation at evacuation centres in Iwate. With the summer heat soon approaching, seasonal electronic appliances (i.e. electronic fan) will be considered for distribution.

<Distribution of electronic household appliance sets>

For those who were displaced from tsunami or radiations from nuclear power plant accident had the least amount of belongings when they moved from evacuation centres to empty prefabricated houses or temporary apartments. JRCS has been providing indispensable support for the resumption of self-reliance life; a different phase from the lives in evacuation centres where the minimum living environment was assisted.

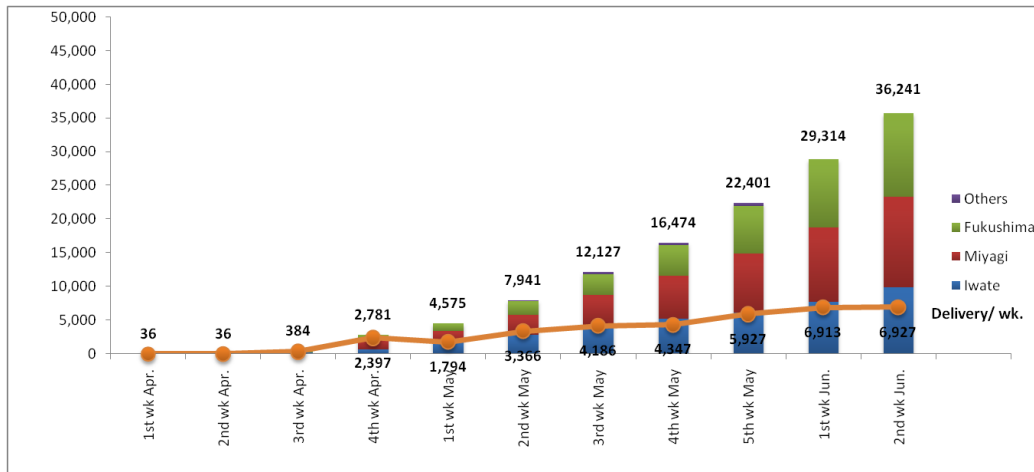

Although the number of construction of prefabricated houses has decreased from the initially envisaged 70,000 down to 51,000, JRCS remains committed to providing 90,000 household appliance packages, as the number of people who prefer to move into subsidised apartments or empty houses has dramatically increased. Out of the 90,000 sets, some 8,000 are funded by European Commission for Humanitarian Aid (ECHO).

The status for distribution of appliance packages as of 19 June follows:

Appliances		# Distributed	Total
Iwate	Prefab Houses	6,628	9,868
	Public/private apartments	3,240	
Miyagi	Prefab Houses	10,547	13,454
	Public/private apartments	2,907	
Fukushima	Prefab Houses	6,358	12,418
	Public/private apartments	6,060	
Other Pref.	Prefab Houses	271	501
	Public/private apartments	230	
			36,241

The rate of distribution of the sets which started at 36 sets per a week rose exponentially to 6,927 sets per a

week by the second week of June; an average of 1,000 sets per a day. Areas of distribution not only stays around the affected areas but also take place in a wide area from Okinawa to Hokkaido, making the distribution challenging.

### 5. Support to social welfare for the elderly and children's education (JPY 3.5 billion)

The delivery of 374 units of medical/nursing beds (64 locations) in Miyagi, 103 in Iwate and 98 in Fukushima is in process.

While the procurement of vehicles for social welfare institutions and municipalities are in process, the government announced the possible compensation of social welfare vehicles and certain household goods. Bearing this new announcement in mind, the municipalities are to request vehicles either from the Government or the Japanese Red Cross by August.

Replenishment of eleven items for the nurses' offices at 120 elementary and junior high schools and nine high schools within Miyagi is in process. Eleven items include: height measurement, weight measurement, vision analyzer, occlude, sitting height measurement, hearing measurement, stretcher, bed, bedding (including mattress, futon mattress, blanket, cotton blanket, linen sheets, pillow and pillow cover), partition and fan.

Throughout the month of June, three teams of care takers were deployed in Iwate. (Fifteen teams deployed since the inception of the project). The team consists of two care takers and they mainly help the elders during the meal and bath.

### 6. Capacity building of JRCS (JPY 1.0 billion)

No progress has yet been made in strengthening the disaster management capacity of the JRCS headquarters, chapters and facilities.

## Cash Grant Programme:

Programme	Activities planned
Assist disaster survivors with cash grant assistance to meet their immediate needs	The cash distributions are executed in accordance with the Grant Disbursement Committee's decisions and are distributed from JRCS to the prefectures' distribution committee, accordingly.

### Progress to date:

The Central Grant Disbursement Committee is to decide upon the criteria for those eligible to receive cash distributions, and the allocations to the prefectures. The funds are then transferred to the prefectures where the local Distribution Committee selects the local recipients based upon the established criteria as well as the nature and extent of damages. The municipalities are then responsible for the distribution of funds and reporting back on those activities. The first cash distributions in accordance with the Grant Disbursement Committee's decisions took place on 8 April and the second distribution on 6 June.

As of 23 June, 2011, JPY 251 billion (approximately USD 3.1 billion) has been collected from national and international donor sources by JRCS (excluding that from sister societies), and approximately **JPY 231 billion** (approximately USD 2.9 billion) has been transferred from JRCS to 15 prefectures upon request from the prefectures. The distribution is reflected in the following chart:

Prefecture	1st distribution	2nd distribution	Total
Hokkaido	350,000	4,480,000	4,830,000
Aomori	275,410,000	432,880,000	708,290,000
Iwate	10,435,680,000	16,695,000,000	27,130,680,000
Miyagi	35,524,420,000	62,200,600,000	97,725,020,000
Yamagata	1,230,000	2,520,000	3,750,000
Fukushima	35,045,000,000	53,871,160,000	88,916,160,000
Ibaraki	3,050,470,000	6,231,680,000	9,282,150,000
Tochigi	466,750,000	730,800,000	1,197,550,000
Gunma	530,000	840,000	1,370,000
Saitama	15,680,000	72,520,000	88,200,000
Chiba	1,631,820,000	4,099,760,000	5,731,580,000
Tokyo	37,410,000	75,880,000	113,290,000
Kanagawa	1,400,000	16,800,000	18,200,000
Niigata	63,780,000	99,960,000	163,740,000
Nagano	42,320,000	68,880,000	111,200,000
	<b>86,592,250,000</b>	<b>144,603,760,000</b>	<b>231,196,010,000</b>

(JPY)

*Operational gaps, challenges or constraints:* The widespread dispersion of those affected by the disaster, the destruction of municipal and individual records in the affected community, and the destruction of municipal offices and loss of staff all affect the ability of the municipalities to distribute the funds.

## Communications, Media and Public Information

The Japanese Red Cross Public Relations Office issued a press release on the three months anniversary (since 3.11) for both the national and international media. In review of the three months, the medical relief activities of the Japanese Red Cross were taken up positively by a number of media. The requests for interviews continue to come in, including those from international media. (i.e. Australia, Germany, India, Sweden, UK and US). The production of the renewed English website for the Great East Japan Earthquake is in process and is scheduled to be launched shortly. Also, Patrick Fuller, communications manager, Asia Pacific Zone Office of the IFRC based in Kuala Lumpur and Francis Markus from the East Asia delegation of the IFRC in Beijing have made visits to Japan to discuss the long term strategies for public relations and have visited the field.

## How we work

All Japanese Red Cross and IFRC assistance seeks to adhere to the Code of Conduct for the International Red Cross and Red Crescent Movement and Non-Governmental Organizations (NGO's) in Disaster Relief and the Humanitarian Charter and Minimum Standards in Disaster Response (Sphere) in delivering assistance to the most vulnerable.

The vision of the Japanese Red Cross, as a member of the IFRC, is to inspire, encourage, facilitate and promote at all times all forms of humanitarian activities, with a view to preventing and alleviating human suffering, and thereby contributing to the maintenance and promotion of human dignity and peace in the world.

The Japanese Red Cross and IFRC's work is guided by Strategy 2020 which puts forward three strategic aims:

Save lives, protect livelihoods, and strengthen recovery from disaster and crises.

Enable healthy and safe living.

Promote social inclusion and a culture of non-violence and peace.
